#### Press Releases:

Russia: "AAK, another D-DAY"

Paris: The peoples of France are stunned by the\*provoked(un-)\* attack upon Southern France. President Bacchus, in a report to the people, stated, "the Italian sneak attack shall be recorded in history as the most vicious crime ever perpetuated by one state against another.... I am unable to explain the criminal actions of the Italians. So desperate are they to justify their inhuman actions they accuse France of assassinating King Anzolicus. Such an obvious fabrication is beneath the general quality of Italian lies. France would never assassinate the King. He was Italy's worst enemy. If Italy desires to accuse France of inhuman acts" I respectfully recommend that they accuse France of supporting the regime of King Anzolicus."

BIG BROTHER #75:

A Letter From The Front: Part IV;

Wiges, Germany Feb. 23, 1919

For several days we took life easy. We moved over to a town called Varamiye where we stayed till the Fourth of July. After that we then moved back near Paris for a few days. We left there by truck one night and after an all night's ride we arrived to within 25 kilometers of the front.

We camped in a large woods here for a few days. The night of July 17 we started with light packs on a forced march for the front. It was nice when we started but about eleven o'clock it started to rain with the lightning flashes so sharp that it would almost blind us.

The road was full of troops, Artillery, and ammunition wagons all going the same way. We reached our destination a little before daybreak and lie in a wheat field till the Barrage started. That morning July 18 was the prettiest sunrise I ever saw.

We were just behind the 75's. All the heavier artillery was farther back. A little after daybreak the Attack started and the first day we drove them back fast as we captured about all their first and second line artillery. But the resistance commenced to stiffen on the second day.

After we crossed the Paris and Soissons road they fought hard. The Second Battalion Engineers lay in reserve just the other side of it. About half a mile away was a chain of hills and here the Germans made a stand.

Our boys surged back and forth half a dozen times before they reached the top to stay. Every time they were driven back reinforcements were sent to them. B and C Companies of the Engrs. went into it here and both lost heavily. A Co. went over with the tanks. D, E, & F were in Reserve.

The reserve and support is almost as bad as the front line as it gets all the artillery fire. We lay just in front of our own 75s here and the Dutch again serenaded us for fair.

At night they would try to get us with bombs from Airplanes. These are worse than Artillery. We were relieved here by the Scotch or "The Ladies From Hell" as the Bosh call them. They are odd looking fellows and terrible fighters.

We left here July 25. We spent a few days in the rear and then hit the line again at Pont a Musson. This was a quiet front and was almost as good as a rest camp.

(Cont. next issue:)
